

## Agronomy CDE

### Purpose

The purpose of the Agronomy Career Development Event is to create interest and promote understanding in agronomy by providing opportunities for recognition through the demonstration of skills and proficiencies.

Objectives for this event are:

- Demonstration of basic knowledge of agronomic sciences;
- Exploration of career opportunities, skills, and proficiencies in the industry;
- Understanding sustainable agriculture and environmental stewardship through the use of Integrated Pest Management and Best Management Practices.

### Sponsor

Clifton Seed Company currently sponsors this event.

### State Event Superintendent

The superintendent for this event is the State Agricultural Education Leader, Department of Agriculture and Human Sciences, NCSU, Campus Box 7654, Raleigh, NC 27695-7654. Phone: 919.513.1205 Fax: 919.513.3201

### Eligibility and General Guidelines

This event is open to all FFA chapters and FFA members in good standing. FFA Members may not participate in a Career Development Event that leads to a state level event after July 1, following their high school/early college graduation. Members winning a previous state event in this area or that have participated in a previous national event in the area are ineligible.

Each chapter may send one team to compete at the state event. **Teams shall consist of three or four members. Four scores will count towards the team total (A three-member team will earn a zero for the 4<sup>th</sup> score).** No alternates are allowed in state events. Any alternate found participating in a state event will result in total team disqualification.

FFA members in good standing may also participate as individuals in this event. A chapter may have up to two members participate as individuals as long as the chapter does not have a team participating in the event. Their scores will only count toward individual recognition, and will not be tallied as a team score.

The use or possession of cellular phones or any other mobile electronic communication device is prohibited during any state-level career development event. Any violation of this rule by any team member will result in total team disqualification.

FFA members participating in career development events that require the use of calculators may only use non-programmable/graphing calculators that do not have the ability to communicate with other calculators. Calculators will be screened prior to the start of a CDE for acceptability. Students caught using data stored on a calculator or communicating with other calculators will result in a total team disqualification for the event.

Any member found cheating in any state-level career development event will result in total team disqualification for that event.

**The North Carolina FFA Association, in keeping with the FFA mission and purposes, does not permit the use of tobacco products, e-cigarettes, vapes, or Juuls at any FFA facility or at any FFA activity.**

At the North Carolina FFA State Convention, participation in more than one FFA CDE event is permitted as long as events are not being held concurrently and no special provisions are required to facilitate participation with the exception that parliamentary procedure and public speaking and parliamentary procedure and Creed speaking which are held concurrently will allow dual participation and special provisions for flighting.

### Dress Code

Participants are required to follow the North Carolina FFA Career Development Event Dress Code. A ten percent reduction in the total team score will be taken if a participant violates the dress code. Participants are allowed to wear long pants, an appropriate shirt with a collar or an appropriate high school or FFA t-shirt or they may wear official dress as described in the FFA manual.

*The North Carolina FFA Association strives to promote a positive image at all Official FFA Events. The dress code policy was established to address the issue of appropriate attire at all Official FFA Events. Members should adhere to this policy for all events. A ten percent reduction will be applied to all individual scores from a chapter if a participant from that chapter violates the dress code during that career event.*

### Procedures for Administering the Event

#### Part 1: General Knowledge Exam - 100 points

Twenty-five objective multiple choice questions will be given to each participant. Questions will come from the references listed at the conclusion of this document.

#### Part 2: Annual Practicum – 250 Points

Students will identify 25 weed and/or crop plants and/or weed and/or crop seeds. Live plant specimen will only be used and may be in any stage following emergence. The weed and/or crop seeds can be shown as treated and/or untreated seeds. Refer to the North Carolina Plant and Seed List.

#### Part 3: Insect Identification – 100 Points

Ten samples will be identified according to insect name. The insect specimens can be shown as either live and/or mounted form. Refer to the insect identification list.

#### Part 4: Equipment and Machinery Identification - 100 Points

Students will identify 10 items from the machinery list. Samples may appear as actual equipment, scale models, toys or pictures.

#### Part 5: Usability (Crop Quality) - 100 Points

Students will be given two classes of crop samples: one will be forage and the other a vegetable crop. Each class will consist of four samples of the same crop. Participants will rank each class with a Hormel card (50 points per sample).

## Scoring

Maximum Score (Individual)/(Team)	650/2600
1. General Knowledge Exam	100
2. Annual Practicum	250
3. Insect Identification	100
4. Equipment and Machinery Identification	100
5. Usability (Crop Quality)	100

## Procedure for Determining the State Event Winner When Scores are Tied

In the event a tie score exists, apply the following methods in sequential order until the tie is broken.

1. Compare the total team score for the annual practicum and the higher scoring team is the winner.
2. Compare the total team score for the general knowledge exam and the higher scoring team is the winner.
3. Compare the total team score for the Insect Identification and the higher scoring team is the winner.
4. If these methods fail to break the tie, co-winners will be declared and a run-off event will be held to determine which team will represent North Carolina at the National FFA Convention. The run-off event will follow the same rules as the state event.

## Procedure for Determining the State Event Winner When Scores are Tied for Individual Participants

Ties in scores between individuals will be broken by comparing the scores of the portion/section of the event that carries the highest point value. The order of comparison would be Annual Practicum, General Knowledge Exam, Insect Identification, Equipment and Machinery Identification and Usability.

## State Awards

The awards for the state event will be presented annually at the state FFA convention to include a team 1<sup>st</sup>, 2<sup>nd</sup> and 3<sup>rd</sup> place plaque and a travel monetary award. The high scoring individual will receive a plaque.

## National Career Development Event Participation

State winning teams advancing to the national career development event will be automatically registered for the national event. It is the responsibility of the FFA Chapter Advisor to complete all necessary national certification and waiver forms and return them to the state FFA Coordinator by the assigned due date. State winning CDE teams that choose not to participate at the national level should contact the state office by Sept. 1 prior to National Convention. Teams that fail to inform the state office prior to Sept. 1 will be ineligible to participate in that same CDE for the next year (chapters may appeal to the State FFA Board of Directors). Teams that do not compete at National Convention will be required to pay back the \$500 travel award.

State winning CDE Teams that choose not to participate at the national level should contact the state office by Sept. 1 prior to national convention. Teams that fail to inform the state office prior to Sept. 1 will be ineligible to participate in that same CDE for the next year (chapters may appeal to the State FFA Board of Directors). Teams that do not compete at the National Convention will be required to pay back the \$500 travel award.

## Bibliography

Tests used in previous state events are available online at [www.ncffa.org](http://www.ncffa.org) to instructors who wish to use them as instructional aids.

The following is a list of the general references for the material covered by the National FFA Agronomy Career Development Event.

1. Ohio Agronomy Guide – Ohio Extension
2. University of Arizona, College of Agriculture- *Plant Growth and Development, Plant Production Management, Weeds, Insects*
3. *Corn and Soybean Field Guide*-Perdue Extension
4. Nasco References
5. University of Illinois, College of Agriculture – *Crop Plant Booklet, Weed Plant Booklet, Field Scouting Manual*
6. *NCSU Forage Crop Evaluation*
7. *Missouri Vegetable Crop Evaluation*

**FOR THE PURPOSE OF THE WRITTEN EXAM ONLY THE** North Carolina Agricultural Production I/II Outline and Test Bank Questions (Agronomy and Land Management Sections) will be used.
