

## Forestry CDE

### Purpose

The purpose of the Forestry Career Development Event is to stimulate student interest and to promote forestry instruction in the agricultural education curriculum. By participating in this event, students gain an understanding of the economic impact of the forest environment and the forestry industry, while recognizing environmental and social factors affecting the management of forests.

### Sponsor

This event is currently sponsored by David and Beverly Harris, Wayne Community College, and NCSU College of Natural Resources.

### Superintendent

The superintendent for this event is Mr. Andy VonCanon, Western Region Agricultural Education Coordinator, Mountain Horticulture Crops Research and Extension Center, 455 Research Drive, Mills River, NC 28759, Phone: 828-553-6296 Fax: 828-684-8715 Email: andy\_voncanon@ncsu.edu

### Eligibility

This event is open to all FFA chapters and FFA members in good standing. FFA Members may not participate in a Career Development Event that leads to a state level event after July 1, following their high school/early college graduation.

Members winning a previous state event in this area or that have participated in a previous national event in the area are ineligible.

The top three teams in the federation are eligible to participate in the regional event unless modified by the region. The top three individuals in the federation event are eligible to participate in the regional event as individuals regardless of their team placing. The top three individuals in the regional event are eligible to participate in the state event as individuals regardless of their team placing.

The appropriate numbers of teams based on event participation from each region are eligible to compete in the state career development event. The top three individuals in the regional event are eligible to participate in the state event as individuals regardless of their team placing. Teams and individuals advancing to state event participation must be certified by the regional FFA advisor. **Teams shall consist of three or four members. Four scores will count towards the team total (A three-member team will earn a zero for the 4<sup>th</sup> score).** No alternates are allowed in the state events. Any alternate found participating in a state event will result in a team disqualification.

The use or possession of cellular phones or any other mobile electronic communication device is prohibited during any state-level career development event. Any violation of this rule by any team member will result in total team disqualification.

**The North Carolina FFA Association, in keeping with the FFA mission and purposes, does not permit the use of tobacco products, e-cigarettes, vapes, or Juuls at any FFA facility or at any FFA activity.**

FFA members and advisors may not visit the site of the state career development event within seven days of the start of the event. Teams that violate this rule will be disqualified.

Any member found cheating in any state-level career development event will result in total team disqualification for that event.

At the North Carolina FFA State Convention, participation in more than one FFA CDE event is permitted as long as events are not being held concurrently and no special provisions are required to facilitate participation with the exception that parliamentary procedure and public speaking and parliamentary procedure and Creed speaking which are held concurrently will allow dual participation and special provisions for lighting.

## Dress Code

Participants are required to follow the North Carolina FFA Career Development Event Dress Code. Participants are allowed to wear long pants, an appropriate shirt with a collar or an appropriate high school or FFA t-shirt.

*The North Carolina FFA Association strives to promote a positive image at all Official FFA Events. The dress code policy was established to address the issue of appropriate attire at all Official FFA Events. Members should adhere to this policy for all events. A ten percent reduction will be applied to all individual scores from a chapter if a participant from that chapter violates the dress code during that career event.*

## Procedures for Administering the Event

The event will consist of four sections, with each member of the team participating in all sections. No two members of any one team will participate in the same section at the same time.

Each section of the event will have a maximum time limit of thirty (30) minutes, requiring orderly movement of all participants in sequence from the section that they were assigned at the beginning.

Participants are expected to bring the following items:

- Tree Scale Stick (Biltmore Stick)
- Clipboard
- Pencil
- Handheld Calculator
- Compass

No additional equipment or tools are allowed for use.

FFA members participating in career development events that require the use of calculators may only use non programmable/graphing calculators that do not have the ability to communicate with other calculators. Calculators will be screened prior to the start of a CDE for acceptability. Students caught using data stored on a calculator or

communicating with other calculators will result in a total team disqualification for the event.

The four sections of the Forestry CDE are:

### **Part 1: Timber Cruising for Board Volume (Saw Timber)**

Each participant will provide his or her own scale stick. Calipers, diameter tapes or other measuring instruments will not be allowed at the federation, regional, or state level.

The official saw timber tally card is based on the International 1/4 inch Rule Form Class 78 and is included in the supplemental material on subsequent pages. Estimates will be made to the nearest half log (eight feet) of merchantable timber and to inch diameter classes on each tree recorded. The cutoff point at the top of the tree will be a minimum diameter of eight inches (8") or at the point where merchantability stops due to limbs or other defects. Tree heights can exceed 4 logs.

Standing trees will be tagged with numbers. The total board feet of each tree will be computed and recorded but only the total volume determined by the participant will be graded.

The tally sheet will be turned in to the designated official at the end of the 30-minute time period. The total possible points for this section will be one hundred (100) points. One point will be deducted for each ten (10) board feet of variance from the total volume as determined by the event officials.

Minimums: DBH 10 inches, 1" diameter classes

Top Diameter: 8"

Log Height 16'; Round to the nearest ½ log

### **Part 2: Orienteering Practicum**

Each participant will pace the marked property lines of a simulated tract of timber. They will use a hand compass to determine the Azimuth reading and pacing to determine the distance between property markers. Participants will begin at a starting point

and record the distance and Azimuth reading to the next point on the scorecard. Each distance measurement and Azimuth reading is worth ten (10) points. One half of a point (0.5) will be deducted for each degree and each foot the participant is off the correct answer. There will be a total of five lengths measured as property lines. A maximum of 10 points can be deducted from each answer. Total possible points for this section will be one hundred (100) points.

**Part 3: Tree Identification**

Each participant will identify twenty (20) trees. Trees common to the area should be used for local and federation events, but at the regional and state level, any of the trees on the official list can be used. A tree species may be used more than once if necessary. Trees will be numbered 1 to 20. Participants are to write the appropriate number in the correct space on the tree identification answer sheet. The total possible points for this section will be one hundred (100) points. Five (5) points will be deducted for each incorrect answer.

**Part 4: Forestry Equipment Identification**

Each participant will identify twenty (20) tools from the approved equipment list. Each tool is worth five (5) points. The total possible points for this section will be one hundred (100) points.

**Scoring**

<i>Maximum Score</i>	400
Timber Cruising (Saw Timber)	100
Orienteering Practicum	100
Tree Identification	100
Equipment Identification	100

**Procedure for Determining the State Event Winner When Scores are Tied**

In the event a tie score exists, apply the following methods in sequential order until the tie is broken:  
1. Compare the total team scores for the identification component and the higher scoring team is the winner.

2. Compare the total team score for the saw timber component and the higher scoring team is the winner.
3. Compare the total team score for the orienteering practicum component and the higher scoring team is the winner.  
3. If these methods fail to break the tie, co-winners will be declared and a run-off event will be held to determine which team will represent North Carolina at the National FFA Convention. The run-off event will follow the same rules as the state event.  
Special Note: In the event a tie exists between first, second or third place teams on the regional level, the tied teams will be allowed to participate in the state event. In the event a tie exists in a federation event that sends teams directly to state competition, the tied teams will be allowed to participate in the state event.

**Procedure to Determine the High Scoring Individual When Scores are Tied**

In the event a tie score exists, apply the following methods in sequential order until the tie is broken:

1. Compare the individual scores for the identification component and the higher scoring contestant is the winner.
2. Compare the individual score for the saw timber component and the higher scoring contestant is the winner.
3. Compare the individual score for the orienteering practicum component and the higher scoring contestant is the winner.
4. If these methods fail to break the tie, co-winners will be declared.

**State Awards**

The awards for the state event will be presented annually at the state FFA convention to include a team 1<sup>st</sup>, 2<sup>nd</sup> and 3<sup>rd</sup> place plaque and a travel monetary award. The high scoring individual will receive a plaque.

**National Career Development Event Participation**

State winning teams advancing to the national career development event will be automatically

registered for the national event. It is the responsibility of the FFA Chapter Advisor to complete all necessary national certification and waiver forms and return them to the state FFA Coordinator by the assigned due date.

State winning CDE teams that choose not to participate at the national level should contact the state office by Sept 1 prior to National Convention. Teams that fail to inform the state office prior to Sept 1 will be ineligible to participate in that same CDE for the next year (chapters may appeal to the State FFA Board of Directors). Teams that do not compete at the National Convention will be required to pay back the travel award.

ORIENTEERING PRACTICUM  
FORESTRY CAREER DEVELOPMENT EVENT

Instructions: The participant will use a hand compass and pacing to the nearest full foot to simulate the determination of the property lines on a tract of timber. Begin at THE starting mark and record the distance and Azimuth reading to the next mark. Each measurement is worth ten (10) points. One half of a point (0.5) will be deducted for each degree and each foot the participant is off the correct answer. A maximum of 10 points can be deducted for each answer.
