

Land Judging Junior CDE

Purpose

The purpose of the junior division Land Judging Career Development Event is to stimulate interest, encourage proficient development and excellence in land management as taught in agricultural education in grades six through ten.

Sponsor

Duke Energy and the Soil Science Society of North Carolina currently sponsor this event.

State Event Superintendent

The superintendent for this event is Dr. Jason Davis, State FFA Coordinator, NCSU, Campus Box 7654 Raleigh, NC 27695 Phone: 919.515.4206 Fax: 919.513.3201 Email: jason_davis@ncsu.edu

Eligibility and General Guidelines

This event is open to all FFA members in grades 6 – 10 from FFA chapters in good standing. All FFA members in grades 6-10 are eligible to participate in any junior career development event regardless of past participation.

Each chapter may send one team to compete at the state event. **Teams shall consist of three or four members. The top three scores will count towards the team total.** The fourth lowest team member score is not considered except in the case of a tie. No alternates are allowed in state events. Any alternate found participating in a state event will result in team disqualification.

FFA members and advisors may not visit the site of a state career development event within seven days of the start of the event. Teams that violate this rule will be disqualified.

FFA members in good standing may also participate as individuals in this event. A chapter may have up to two members participate as individuals as long as the chapter does not have a team participating in the event. Their scores will only count toward individual recognition, and will not be tallied as a team score.

The use or possession of cellular phones, Personal Digital Assistants (PDAs) or any other mobile electronic communication device is prohibited during any state-level career development event. Any violation of this rule by any team member will result in total team disqualification.

Any member found cheating in any state-level career development event will result in total team disqualification for that event.

The North Carolina FFA Association, in keeping with the FFA mission and purposes, does not permit the use of tobacco products at any FFA facility or at any FFA activity.

Dress Code

Participants are required to follow the North Carolina FFA Career Development Event Dress Code. A ten percent reduction in the total team score will be taken if a participant violates the dress code. Participants are allowed to wear long pants, an appropriate shirt with a collar or an appropriate high school or FFA t-shirt.

Procedures for Administering the Event

The Handbook of Land Judging in North Carolina contains information and other materials related to the contest.

Procedures for setting up a contest are described in the Appendix of the handbook.

Scoring and Related Items:

1. All "key score cards" will be completed by contest officials before the contest begins.
2. The official judge will check to ensure that all official answers conform to the information in the handbook.
3. Junior participants will complete the entire scorecard. Land treatments will be scored as follows: Full credit will be given when a correct treatment number appears in any block designated by event officials. There will be no credit, even if a correct treatment number is

given, if it is outside the number of blocks designated by event officials. This scoring procedure is based on the fact that official judges designate the number of treatments to be selected from each field by participants.

Procedure for Determining the State Event Winner When Scores are Tied

In the event a tie score exists, apply the following methods in sequential order until the tie is broken:

1. Compare the alternate scores. The lowest team member score is the alternate score.
2. If this method fails to break the tie, co-winners will be declared.

Procedure for Determining the State Event Winner When Scores are Tied for Individual Participants

Ties in scores between individuals will be broken by comparing the scores of the portion/section of the event that carries the highest point value: Soil Characteristics, Recommended Land Treatments, Urban Uses, Land Capability Class and Special Environmental Concerns.

State Awards

The awards for the state event will be presented annually on site at the conclusion of the state event to include a team 1st, 2nd and 3rd place plaque and a travel monetary award.

Bibliography

The Handbook of Land Judging in North Carolina contains information and other materials related to the contest may be accessed at the ncffa.org website at http://ncffa.org/Web%20Files/Chapter%20Guide/Land_Jdg_Handbook.Sept.2009.pdf

PART THREE - RECOMMENDED LAND TREATMENTS

(Select treatments and write the number of each treatment in the boxes below, beginning on the left side)

<p>Tillage Systems</p> <ol style="list-style-type: none"> 1. Conventional tillage, conserve crop residue 2. Conservation tillage, manage crop residue 3. Long-Term No Till 	<p>Supporting Practices</p> <ol style="list-style-type: none"> 10. Contour farming 11. Strip cropping 12. Terrace and maintain terraces 13. Construct diversion 14. Establish grassed waterway 15. Establish field border 16. Establish windbreak 17. Install water table control 18. Install surface water management 19. Stabilize sediment source areas 20. Establish recommended grass and/or legumes 	<p>21. Plant recommended trees</p> <p>Management Practices</p> <ol style="list-style-type: none"> 22. Remove obstructions 23. Control grazing 24. Proper pasture management 25. Improve tree stand 26. Woodland protection 27. Harvest trees using recommended method 												
<table border="0" style="width: 100%;"> <tr> <td style="width: 10%;"><input style="width: 40px; height: 20px;" type="text"/></td> <td style="width: 10%;"><input style="width: 40px; height: 20px;" type="text"/></td> <td style="width: 10%;"><input style="width: 40px; height: 20px;" type="text"/></td> <td style="width: 10%;"><input style="width: 40px; height: 20px;" type="text"/></td> <td style="width: 10%;"><input style="width: 40px; height: 20px;" type="text"/></td> <td style="width: 10%;"><input style="width: 40px; height: 20px;" type="text"/></td> <td style="width: 10%;"><input style="width: 40px; height: 20px;" type="text"/></td> <td style="width: 10%;"><input style="width: 40px; height: 20px;" type="text"/></td> <td style="width: 10%;"><input style="width: 40px; height: 20px;" type="text"/></td> <td style="width: 10%;"><input style="width: 40px; height: 20px;" type="text"/></td> <td style="width: 10%;"><input style="width: 40px; height: 20px;" type="text"/></td> <td style="width: 10%;"><input style="width: 40px; height: 20px;" type="text"/></td> </tr> </table>			<input style="width: 40px; height: 20px;" type="text"/>	<input style="width: 40px; height: 20px;" type="text"/>	<input style="width: 40px; height: 20px;" type="text"/>	<input style="width: 40px; height: 20px;" type="text"/>	<input style="width: 40px; height: 20px;" type="text"/>	<input style="width: 40px; height: 20px;" type="text"/>	<input style="width: 40px; height: 20px;" type="text"/>	<input style="width: 40px; height: 20px;" type="text"/>	<input style="width: 40px; height: 20px;" type="text"/>	<input style="width: 40px; height: 20px;" type="text"/>	<input style="width: 40px; height: 20px;" type="text"/>	<input style="width: 40px; height: 20px;" type="text"/>
<input style="width: 40px; height: 20px;" type="text"/>	<input style="width: 40px; height: 20px;" type="text"/>	<input style="width: 40px; height: 20px;" type="text"/>	<input style="width: 40px; height: 20px;" type="text"/>	<input style="width: 40px; height: 20px;" type="text"/>	<input style="width: 40px; height: 20px;" type="text"/>	<input style="width: 40px; height: 20px;" type="text"/>	<input style="width: 40px; height: 20px;" type="text"/>	<input style="width: 40px; height: 20px;" type="text"/>	<input style="width: 40px; height: 20px;" type="text"/>	<input style="width: 40px; height: 20px;" type="text"/>	<input style="width: 40px; height: 20px;" type="text"/>			
<input style="width: 50px; height: 20px;" type="text"/> Score Part 3 Max Points = 27														

PART FOUR - URBAN USES

The soil characteristics judged in PART ONE determine the limitations of a soil for urban uses. Rate each site as to the soil limitations of slight, moderate and severe for each urban use listed below. (CHECK APPROPRIATE COLUMN)

SOIL LIMITATIONS	URBAN USES				
	Septic Systems	Basements	Foundations	Sanitary Landfills	Landscaping
Slight					
Moderate					
Severe					

Special Environmental Concerns
(from back) Max Points = 5

TOTAL SCORE Max Points = 100	<input style="width: 100%; height: 100%;" type="text"/>
--	---

Special Environmental Concerns

Check True or False for each of the following statements:

- | | | |
|---------|---------|--|
| T _____ | F _____ | 1. This appears to be a hydric soil. Check with authorities before draining and/or clearing site. |
| T _____ | F _____ | 2. Risk of groundwater contamination when wet (from soluble nutrients and/or certain pesticides). |
| T _____ | F _____ | 3. Deep leaching of soluble nutrients may restrict rates of animal or municipal waste application. |
| T _____ | F _____ | 4. Proximity to water body may restrict application of certain pesticides and waste materials. |
| T _____ | F _____ | 5. High risk of off-site damage from eroding sediments if vegetative cover is destroyed or absent. |

Special Environmental Concerns Score

Max Points = 5

(Transfer this score to bottom front of scorecard)
